

June 24, 2013

Eric Eikenberry
DNR – Water Control
P.O. Box 7921
Madison, WI 53707

Eric,

Per our phone conversation of June 17, 2013; I have enclosed the information you requested. This should help to clarify statutes and show why we feel we should be exempted from having to secure a Use of Natural Body of Water Permit.

As I stated, 10 years ago I was under duress to file my “grandfather” application. I recall showing additional ponds or depressions as instructed by a DNR contact person.

When I submitted that application, and challenged some DNR definitions about exemptions stated in the permit package, Lee Meyers (DNR, Green Bay) said they would review the information and decide how to rule. The Department kept my fee, instead of returning as they said and later-on a permit arrived. The reason was that one of the depressions I marked on a map was determined to be in the “flood plain fringe”. This point of interest is not used for raising or selling fish, but is a habitat pond, of which several exist.

Today I am still insisting that my trout farm is exempt! I am expecting that all the data I am enclosing will clear up my position of being exempt and I fully expect my \$50 check to be returned to me.

1. Chapter 31.05 Dam – Location is highlighted on maps. That file/permit #2-WP-2072. A few years ago we did some maintenance to the dam structure. I communicated with Dean Stigin, DNR-Madison with all the details at that time. He has photos & related material. That location is Mukwa Township T.22.N-R.14E Waupaca Cty Date 12/16/64.
2. The Trout Farm properties are show on additional parcel maps of Lebanon Township T23N-R14E. There are about 30 ponds & tanks there. At my home, located at the corner of State Hwy 54 & Madden Rd., I have several concrete tanks and one pond. I could not find a good map or photo, but I’m sure if you need one you could see it on Google Earth.

Page 2

3. Enclosed is a copy of my DATCP Fish Farm Registration #215540-AQ
4. Enclosed is a copy of water use data – this will lead you to my High Cap Well Permit
5. DNR notes exempting some ponds that should apply.
6. Copies of tax bills are also enclosed.

Thank you for reviewing this information. I look forward to hearing from you soon.

Sincerely,

A handwritten signature in cursive script, appearing to read "Mike Foster".

Mike Foster

Fish Farm Application For Use of Natural Body of Water

Form 3600-227 (R 3/13)

Page 1 of 2

Notice: Use of this form is required by the Department for any application filed pursuant to ss. 29.733, Wis. Stats., and ss. NR 19.90-95, Wis. Adm. Code. The department will not consider your application unless you provide all information requested and submit the fee(s) indicated for the permit(s) selected. A social security number or federal employer identification number is **REQUIRED** when applying for a license listed in ss. 29.024(2g) or 29.024(2r), Wis. Stats. The number **SHALL NOT** be disclosed to any other person except the Department of Workforce Development or the Department of Revenue to determine liability for delinquent Wisconsin taxes or child or family support. Other personally identifiable information requested on this form will be used for program administration and may be provided to requesters as required by Wisconsin's Open Records law [ss. 19.31-19.39, Wis. Stats.].

Mail this form with its attachments and required fee to WDNR -Natural Waterbody Permits FH/4, PO Box 7921 Madison, WI 53707-7921.

Project Description

A "natural body of water" is defined in Wisconsin law as any spring, stream, pond, lake or wetland that was historically present in a natural state but may have been physically altered over time. A "freeze-out pond" is defined in Wisconsin law as a natural, self-contained body of water in which freezing or anoxic conditions prevent the body of water from naturally sustaining a fish population at least twice every 5 years.

Operating a fish farm in a Natural Body of Water requires a permit under NR 19, Wis. Adm. Code. I am applying for:

- ☒ **NR 19 Permit Renewal** - for continued use of a natural waterbody that was previously permitted as a preexisting fish rearing facility or a freeze-out pond.
- ☐ **Initial NR 19 Permit** - for new use of a natural waterbody for fish farming (note, the waterbody must be a freeze-out pond).
- ☐ **Transfer of NR 19 Permit** - to convey an existing NR 19 permit from one party to another, as a result of change in ownership or leasehold interest of a fish farm.

Number and dimension of ponds, raceways or tanks. Describe here and attach a diagram (Attachment # 4)

ADDITIONAL DATA / INFO ENCLOSED

| <input type="checkbox"/> Other - Specify: | | |

1. What type of pesticides do you currently use or plan to use?

NONE

2. Is your fish farm equipped with barriers that prevent the passage of fish between it and other water of the state? ☒ Yes ☐ No

3. If you are applying for an NR 19 Permit Renewal, have you made any facility changes - expansion, additional ponds, different species reared, etc. - over the last ten years?

☐ Yes ☒ No If yes, describe:

Species Information

Complete the following information regarding your operation: List the quantity of each size of the species of fish you possess or plan to raise on an annual basis in each pond, raceway, natural body of water, freeze-out pond, self-contained body of water or **preexisting fish rearing facility**.

Fish	Eggs	Fry	Fingerling	Yearling	Adult	Fish	Eggs	Fry	Fingerling	Yearling	Adult
Bass						Bluegill					
Largemouth											
Bass						Crappie					
Smallmouth											
Bullhead						Perch					
Muskellunge						Pumpkinseed					
Northern Pike						Sunfish					
Walleye						Tilapia					
Chubs						Brook Trout					
Minnows						Brown Trout					
Shiners						Lake Trout					
Suckers						Rainbow Trout	20 K			6,000	3,000
Atlantic Salmon						Other (List):					
Chinook Salmon											
Salmon											
Coho Salmon											

Attachments (Provide all of the following)

1. Location sketch or map showing route to the project site, indicating nearest main road and crossroad, north arrow and scale.
2. Photocopy of deed, lease, land contract or other documentation showing that the land that is riparian to the body of water is owned, leased, or controlled by the permit applicant.
3. Photocopy of plat book showing property owners; photocopy of any easements for all properties surrounding the waterbody; and other documentation to show that none of the owners of the fish farm or riparian lands provide public access to the body of water by means of an easement or right-of-way or by means of a business open to the public. Note: the owners of the fish farm may allow fishing by the public for a fee.
4. Diagram showing number and dimensions of all ponds, raceways, tanks or other waterbodies to be used for fish farming.
5. For an Initial NR 19 Permit – Documentation to show the natural waterbody is a "freeze-out pond", meaning it is self-contained and has freezing or anoxic conditions that prevent a naturally-sustaining fish population at least twice every five years.
6. For a Transfer of NR 19 Permit – Photocopy of the previous owner's NR 19 permit, and documentation to show change of ownership.
7. Photocopy of any other permits or authorizations required by Ch. 30 or 31, Wis. Stats., the Army Corps of Engineers and any other federal, state or local laws and zoning ordinances for construction or operation of the fish farm. (Note: Permits issued under Ch. 30.19, 30.195 or 31.04 may mean your waterbody is exempt from a permit requirement.)
8. Photocopy of Department of Agriculture, Trade and Consumer Protection (DATCP) Fish Farm Registration from current or previous year.

Note: If conditions 2, 3, and 7 are met, then the DNR may find that your fish farm is exempt from a Natural Waterbody permit requirement. If so, the DNR will return your application and notify you of this finding. **AND FEE**

Type of Permit and Fees
☐ Transfer of NR 19 Permit - \$100 fee

☐ Initial NR 19 Permit - \$ 500 fee

☒ NR 19 Permit Renewal- \$50 fee.

Permit exemptions!

FREQUENTLY ASKED QUESTIONS

How do I know if my fish farm requires a Natural Waterbody permit?

Historical information is critical to be able to determine if the pond is a natural waterbody. By definition, if the fish farm waterway existed in a natural state as a wetland, pond, stream, or lake, then it will be considered a natural waterbody. If your pond was constructed in an area "high and dry," it is not a natural waterbody, regardless if you had to obtain ch. 30 or 31 permits. Historical information like air photographs, county maps and the original governmental survey of 1848 can help.

Can I construct my new fish pond in a wetland?

With most DNR permits, each permit decision is determined on a case by case basis. Remember, that ponds constructed in wetlands meet the definition of natural body of water and will require a NR 19 permit – unless they are exempt by certain ch. 30 or 31 permits being issued. Probably more importantly, there are many practical reasons not locate your fish farm in a wetland. Although the wetland will provide a water source, typically that water source is very nutrient rich which can lead to excessive weed growth, toxic algae blooms and anoxic conditions – none of which are favorable to growing fish. Introducing fish into a system that naturally does not contain fish (like shallow wetlands) can significantly damage the populations of amphibians and reptiles. This may seem like a "small" price to pay, but the cumulative impact of habitat loss and habitat shifts will reduce or even eliminate these precious species.

When will I likely obtain a permit to construct a new fish farm?

All permit applications under ch. 30 are reviewed on a case by case basis. DNR resource managers are trained to examine the potential impacts of a proposed project on the public rights and interests associated with the waterway. However, fish farms meeting the following design recommendations may be more likely permitted:

- Raceways placed outside of wetland boundaries, fed by a high capacity well where the raceways discharge to a non-public warmwater stream or wetland.
- Ponds constructed adjacent to, or on non-public (i.e. non-navigable) warmwater streams that do not impact wetlands and that are properly approved as a pond by ch 30 and 31 permit and not declared public by condition of the permit.❖

DNR Contacts: The DNR has identified a Fish Farm Environmental Permit Coordinator for each of the four DNR districts. The Coordinator does not handle each of the different types of permits, but can direct you to the appropriate DNR staff to assist you with your permit or answer your question.
